

Mock Tests Overview

The Breath Alcohol Technician (BAT) mock test consists of 7 mock breath test situations. The Screening Test Technician (STT) mock test consists of 5 mock breath test situations. The Certified DOT Specimen Collector (CDSC) consists of 5 mock urine collections. The collector must perform each one of these mock tests without error in front of the proctor. The mock tests are done over Skype, so a computer with a camera will be required.

If an error is made during the first three mock test situations (e.g. the collector forgets a step or performs a step incorrectly) then the mock test will be cancelled and restarted from the beginning. This restart will only be offered once per mock test.

If an error is made from the fourth mock test onward, then the mock test will be cancelled and a new mock test will have to be rescheduled. Each trainee is allotted TWO mock test tries. If you make an error on the first one and have to reschedule, it will be done for free. If you make an error on the second mock test then the third mock test will cost \$95.00 to rebook.

After completing mock tests, without error, you will be required to email or fax your completed forms (either DOT ATFs, or CCFs) for auditing. These forms must be ERROR-FREE. Please make sure to **check every form** against the sample sheet included in the mock test package. If a single error is found on one of the forms you will be required to complete the ENTIRE mock testing again at a cost of \$95.00.

Non-DOT ATFs and non-DOT CCFs are **not to be used** and will not be accepted.

It is a DOT requirement to obtain error-free mock tests and one that we are required to mandate.

Key Points

- Forms used must be DOT
- One restart per mock test allowed, if an error is made
- Two mock test chances given for free
- Third mock test costs \$95 if required
- Forms must be sent in and be perfect to pass
- See specific mock test breakdown for items required for each mock test

Mock Test Situations

BAT

1. Positive screen, positive confirmation
2. Positive screen, negative confirmation
3. Positive screen, abnormal occurrence: refusal
4. Insufficient breath sample (manual test required)
5. Normal screen, negative result
6. Normal screen, negative result
7. Normal screen, negative result

STT

1. Normal screen, negative result
2. Normal screen, negative result
3. Normal screen, negative result
4. Insufficient breath sample (manual test required)
5. Positive screen, handoff to BAT

CDSC

1. Normal test
2. Normal test
3. Insufficient quantity
4. Temperature out of range (TOR), mock observed collection
5. Refusal to sign
